"x median" = how many times more views this reel got than the creator's typical reel (vidIQ outlier score) — a high number means the *format* worked, not just the account size. Match = how closely it fits the brief (simple, home, selfie/propped phone, lip-sync/pose to music).

What these 20 have in common

Start on frame 1
Almost every reel starts mid-action: already posing, dancing or lip-syncing. No intro, no 'hi guys'.

Static, single shot
One take, phone held or propped. 'Low visual change' was tagged on nearly all 20 — realism beats editing.

Short and loopable
Most are 5–15 s and end where they begin, so viewers watch 2–3 times (boosts watch time).

Mirror selfie = top format
8 of 20 are mirror selfies: outfit/pose + trending audio. Easiest to film, very high outlier scores (up to 519x).

Trending audio carries it
Music-only mix on almost all. A recognisable song or sped-up remix is the hook, not the person talking.

Text hook optional
When used, it's one relatable line ("Gym outfit today", "me when..."). Lyrics-as-text also works.

Home, natural light
Bedroom, kitchen, mirror, floor. Daylight from a window or a simple warm lamp. Nothing studio-like.
